

# HITARTH SHAH

Full-Stack & Mobile Developer | Machine Learning Enthusiast

+91 98339 12379 • hitarth0405@gmail.com • linkedin.com/in/hitarthshah • github.com/Hitsha123

## PROFESSIONAL SUMMARY

Final-year B.Sc. Information Technology student (graduating 2026) with demonstrated experience building production-grade applications across full-stack web, mobile, machine learning, and IoT domains. Delivered a published research paper on a mobile nutrition tracking system and is currently developing an AI-driven stock analysis platform. Passionate about solving real-world problems through clean, scalable code.

## EDUCATION

| <b>AI-Powered Stock Recommendation &amp; Portfolio Management System</b><br><i>Python · Machine Learning · React.js · Firebase</i> <ul style="list-style-type: none"><li>Designing ML models that ingest market trend data and user risk profiles to surface personalised stock recommendations.</li><li>Building interactive dashboards for portfolio tracking, capital allocation suggestions, and risk analysis.</li><li>Integrating real-time financial APIs alongside NLP-based sentiment analysis on financial news feeds.</li><li>Delivering a responsive React.js frontend with Firebase authentication and cloud data persistence.</li></ul> | In Progress              |
| <b>NUTS – Nutritional Understanding &amp; Tracking System</b><br><i>React Native · Firebase · ML Kit · IJCT/IEEE Standard, 2025</i> <ul style="list-style-type: none"><li>Led end-to-end development of a cross-platform mobile nutrition tracker from architecture through deployment.</li><li>Integrated Firebase for real-time database management and secure multi-user authentication.</li><li>Implemented ML Kit food recognition to automate nutrient extraction from photos, reducing manual input.</li><li>Co-authored research paper documenting system architecture, model performance, and user study results.</li></ul>                  | Research Paper Published |
| <b>Stock Price Prediction System</b><br><i>R · ggplot2</i> <ul style="list-style-type: none"><li>Developed predictive regression models on historical price data using statistical forecasting techniques.</li><li>Produced rich visual dashboards with ggplot2 to surface actionable insights for financial decision-making.</li></ul>                                                                                                                                                                                                                                                                                                               |                          |
| <b>IoT-Based Weather Monitoring System</b><br><i>ESP32 · C++ · Firebase · React Native</i> <ul style="list-style-type: none"><li>Engineered a sensor network (temperature, humidity, pressure) on ESP32 with real-time Firebase telemetry.</li><li>Built a companion mobile app that visualises live sensor feeds and historical trends.</li></ul>                                                                                                                                                                                                                                                                                                    | In Progress              |
| <b>Student Training &amp; Placement Management System</b><br><i>Java · MySQL</i> <ul style="list-style-type: none"><li>Delivered a full-cycle placement portal covering student registration, company listings, interview scheduling, and outcome tracking.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                 | Team Project             |
| <b>Train Ticket Booking System</b><br><i>Java · Swing</i> <ul style="list-style-type: none"><li>Built a desktop booking application with seat availability checks, booking &amp; cancellation flows, and ticket history via an intuitive Java Swing GUI.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                    |                          |

## ACHIEVEMENTS & CERTIFICATIONS

- Co-authored a research paper on the NUTS Nutrition App, submitted to IJCT/IEEE standards (2025).
- Built 6+ production-grade applications spanning mobile, web, machine learning, and IoT domains.

### Certifications

- Programming in C, C++, Python, SQL & HTML – Raj Computers, Mumbai
- Introduction to R Programming – Raj Computers, Mumbai
- Java Development for Beginners – Raj Computers, Mumbai

## SOFT SKILLS

Analytical Problem Solving · Team Collaboration · Quick Learning · Attention to Detail · Time Management
